The Smart Contract, Centralized and Decentralized Applications Platform

Smart Contracts Applications?

Smart contract applications include financial purposes such as investing, borrowing, lending and trading. Healthcare, and real estate as well as gaming can be used in this kind of applications; as well as more complex applications involving

like having digital assets being directly controlled by a piece of code implementing arbitrary rules ("smart contracts") or even entire corporate structures can be used to configure even blockchain based centralized (CEX), decentralized (DEX) autonomous organizations (DAOs).

Ethereum blockchain

A Decentralized blockchain platform that a peer-to-peer network establishes that securely executes and verifies application code is called smart contracts. Without a trusted central authority allow participants to transact with each other by the Smart contracts.

Binance

Binance is a cryptocurrency exchange in which is the largest exchange in the world in terms of daily trading volume of cryptocurrencies.

BEP-20 Smart Contract

Binance Smart Chain token standard is BEP-20. It's quite similar to Ethereum's ERC20 standard; in other word, it expands on it. BEP20 sets rules that should be follow by the all tokens created on Binance Smart Contract (BSC).

Programmable blockchain with support for smart contracts and compatible with EVM, makes it a good piece of codes for building decentralized applications.

Azuray AZY

Azuray AZY is a decentralized blockchain application that built on BEP-20 Smart Contract.

Vision

Azuray AZY is a member token of the Financial Support Project Module. This module is a member of an enterprise blockchain project "The Project VR".

Azuray AZY BSC BEP20 Token is a member of crypto financial support module.

Azuray was designed due to the recent needs of P2P transactions solutions.

Azuray AZY is not a Security token

It's not exactly the security. It looking alike. Actually, in the very first stage we decided to dedicate with the projects are

already in the R&D mode. And some of them are about to be finalized.

To dedicate with the projects, the reason was that, that is quite clear, to provide a consistent amount of money in the backup to persist the projects sustainable and scalable.

The Financials module would remain confident concerning the financial need but we are not totally dependent on it it a real public to public currency not the security, briefly its quite should be clear, we think.

Life time of Azuray AZY Token

The stability of Azuray AZY bep20 token related to the strategy inspired by the trend of the financial markets. Due to the fake blockchain projects revolving in the market because

of the fame of the crypto currencies of the market we decided to launch C-EXINS's own blockchain project to make investments stable and secure as well as which could be in the interest of the every market investors.

Smart Contract was the fastest way to bring C-EXINS's ideas into the reality. We chose the Binance Smart Contract BEP-20, a better solutions for our blockchain tradable crypto currency like bitcoin.

Azuray AZY Trade with Pairs BNB/AZY, MINTME/AZY

Created & owned by the C-EXINS Blockchain Department.

Launched on 15 of May, 2022. Built on Binance Smart Chain Technology.

Successfully tested swap-ability with (BNB / Azuray AZY) on pancake.finance/swap , Trade with the pairs (MINTME / Azuray AZY) on Mintme.com Exchange.

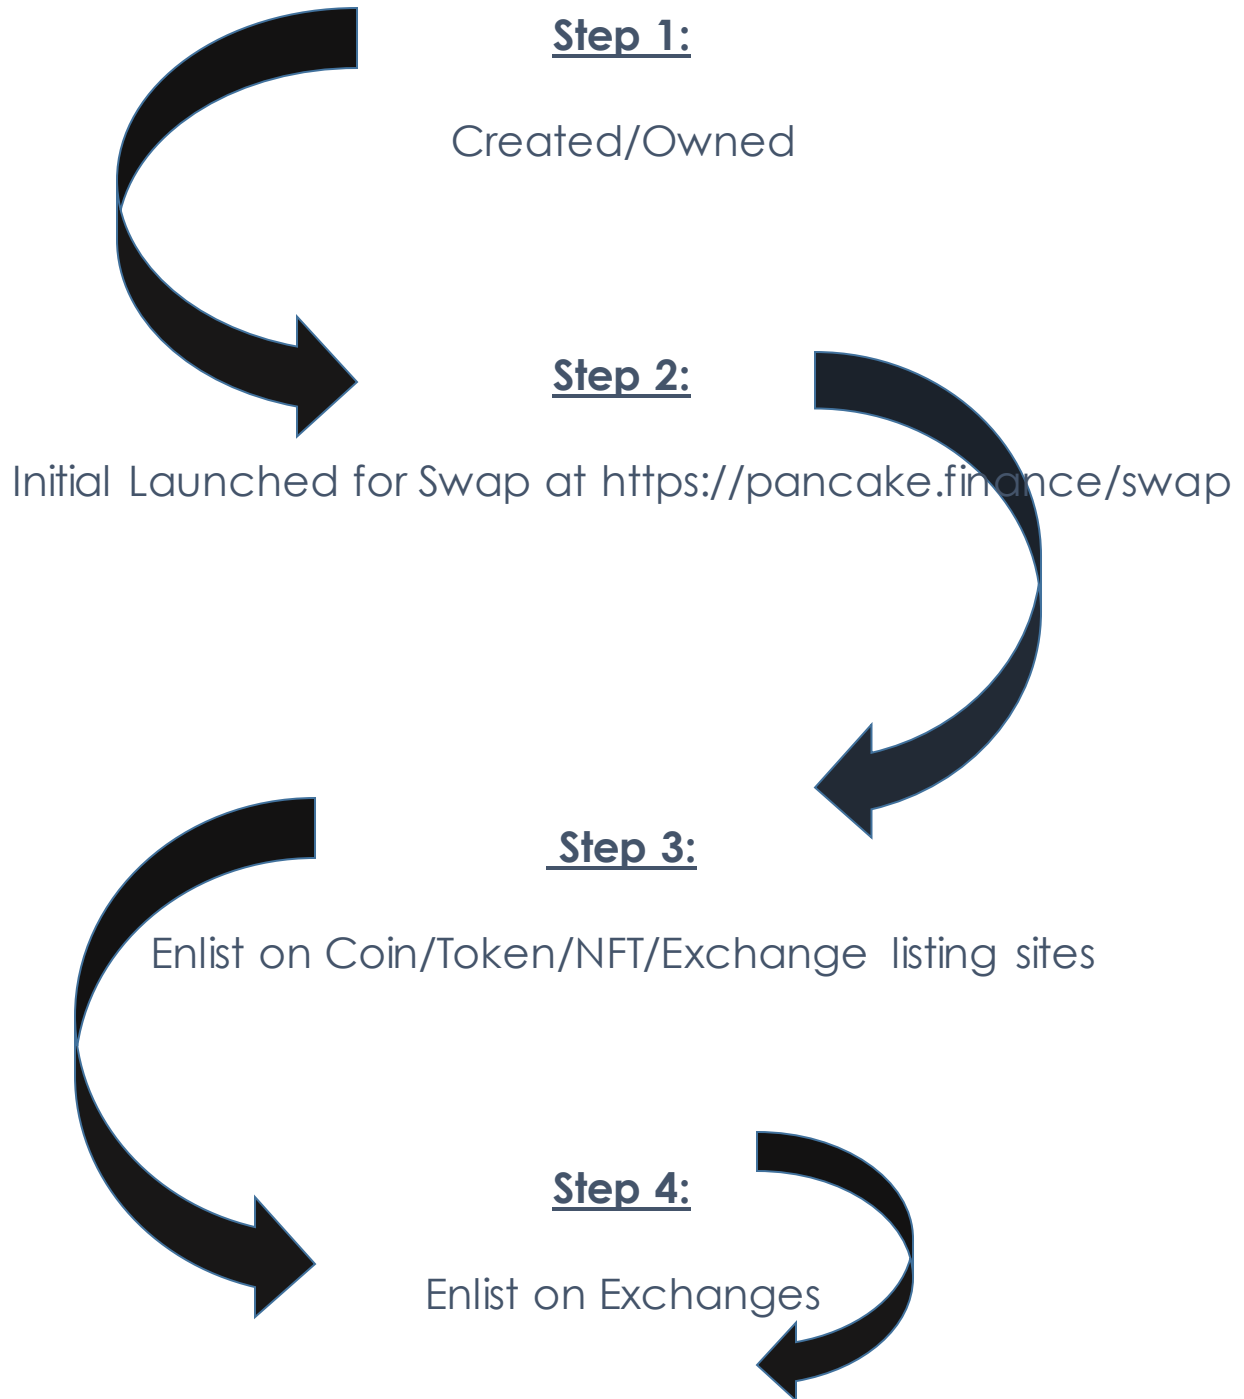

Azuray AZY listed on Coins listing Markets

Azuray AZY is listed on several crypto currency price updates portals providing the 24/7 market capital ticking facilities.

Roadmap & Timeline of the Azuray AZY project

Step 5:

Open for Trade

Step 6:

Get included into StableCoin to Azuray AZY bep-20 Token

Step 7:

Design & developments for the Azuray AZY ecosystem

Step 8:

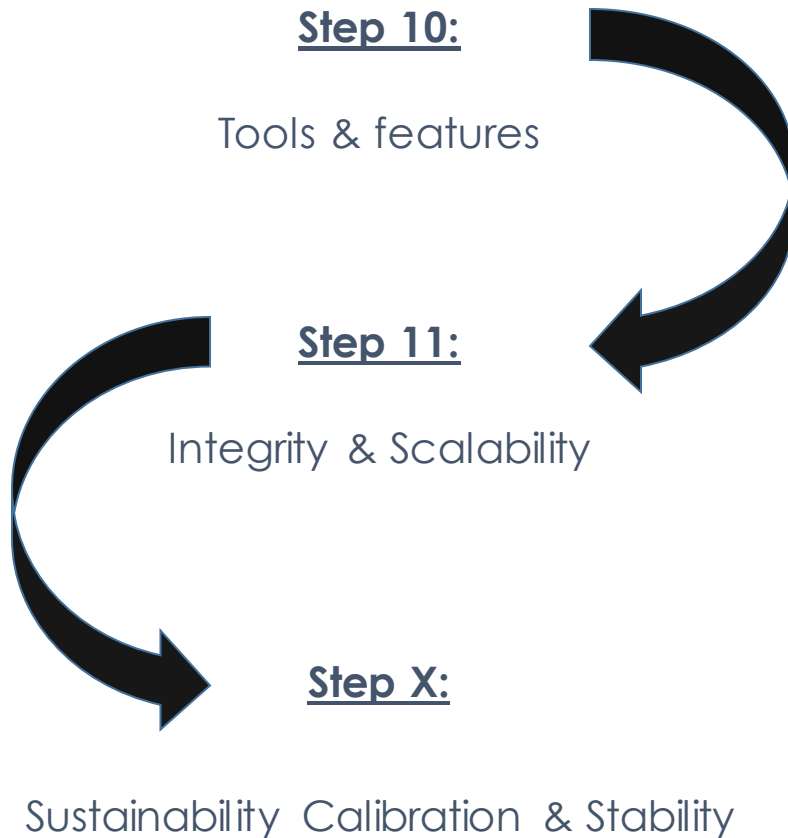

Create the market place for Azuray AZY

Step 9:

Payment Processor for easy payments

Azuray AZY would be available for trade on exchanges right after the completion of required legal documentation “ Legal opinion letter “, where needed, to increase the trust and reliability of the Azure AZY BSC BEP20 token. And for the accomplishment of the buy's safety levels as well.
